TO: Minerals File

FROM: Lynn Kunzler, Reclamation Specialist 

RE: Site Inspection, Anderson Supply Company, Anderson Supply Mine, S/049/018,  
Utah County, Utah

Date of Inspection: May 11, 1999  
Time of Inspection: 9:00 a.m.  
Conditions: Clear and warm  
Participants: John Anderson, Operator and Lynn Kunzler, DOGM

Purpose of Inspection: To evaluate reclamation needs on SITLA lands.

The School Trust Lands are to the north of the main mining disturbance, with the access to the site going across. At the quarry area, very little material was ever removed from SITLA lands and it appeared to have been several years since it was last disturbed (as evidenced by the natural invasion of vegetation). There was some slumping on the SITLA land but it also appeared to be several years old, and was well vegetated. It was determined that additional reclamation on the SITLA lands would not be needed unless it was disturbed again. A copy of this memo to SITLA should be considered adequate as to the Division not requiring further reclamation activities on the SITLA portion of the quarry.

The main area from which clay has been removed is private lands. It appeared that some material was removed from the site during the last several months (probably last fall). Mr. Anderson indicated that he had received a check from his partner several weeks ago and thought that it was for the recent material that had been removed. It was discussed that before the Division could release the portion on private lands, additional reclamation would be needed, including regrading and seeding. Mr. Anderson thought that he and his partner would keep the site open for now. Mr. Anderson was informed that the Division would send him another billing statement for the permit fee (\$100.00) and it would need to be paid as soon as possible.
